Demand The Difference®

Since 1986, Sailfish Boats has provided the saltwater enthusiast with a variety of reliable, stylish and user friendly boats capable of withstanding the rigors of the inshore and offshore environment. Over that time, Sailfish has grown to be one of the largest manufacturers in its class. With a modern facility located in Cairo, Georgia, just a few miles north of the Florida state line, Sailfish is able to distribute to a national dealer network, offering top quality service no matter where you are.

“Demand The Difference” is not just a slogan, but part of a strategy to exceed the customer’s expectations. Our design and product planning team, a group of seasoned boaters, fisherman, and marine design professionals, strive to bring the absolute best form, function, and style into every product we manufacture. We believe safety, low maintenance, ease of operation, and standard and optional equipment must integrate for operator and passenger into one seamless product. At SAILFISH we demand this of ourselves, as part of our product strategy. There are hundreds of details that we consider essential in our design, many that not everyone may notice. These details emphasize the major items that separate SAILFISH from our competition and represent the “DIFFERENCE” in every SAILFISH product.

OUR EXCLUSIVE VDS HULL DESIGN:

Nearly 20 years of refinement has resulted in the VDS running surface available exclusively on Sailfish Boats produced today. Our deep vee, variable dead rise hull’s ride smoother, dryer and are more fuel efficient because of our multiple lifting planes, functional water management, and efficient lift, not possible in conventional running surface design. Regarded by many to be the best all around vee bottom performer in the industry, our competitors have chosen not to invest the engineering and energy necessary to compete at this level, creating a major performance “DIFFERENCE”.

SAFETY: The Lifesaver Ladder

All SAILFISH models 21 through 31 feet include an integral telescoping ladder, located as close to the water as practical design will allow. 99% of the time this ladder will be used for boarding on dry land, swimming diving and snorkeling by people who exited the boat on purpose. For those who end up in the water without forethought as to how they will return to the boat, or who did not plan on being out of the boat, but find themselves there, with no one to help them, the ladder could save their lives. A “DIFFERENCE” many will appreciate.

GUNWALE HEIGHT

From the 218 through the 3160 our SAILFISH models offer the greatest cockpit depths in the industry. Designed to keep the people in and the water out, and provide an additional margin of safety to the operator and passengers. This is an especially important “DIFFERENCE” for the family with children.

OVERSIZED COCKPIT DRAINS

Our SAILFISH self-bailing cockpits are engineered to drain any surface water at a higher rate than it can accumulate under normal circumstances. All models have the largest deck drains in their class providing a margin of safety and convenience that surpasses most of our competitors. Drains are recessed below the floor allowing the maximum amount of water to exit the deck, a feature that allows for easier cleaning and surface debris removal at the end of the boating day. A “DIFFERENCE” the experienced boater will enjoy.

BOW RAILS

Our standard low profile bow rail design on all SAILFISH center console models, allow the user to anchor themselves to the deck in rough water conditions. Placement and height being a critical element to lower your center of gravity and maintain balance during pitch and yaw. Walk around and express models offer full height bow rails, and wide walk around surfaces for maximum security, representing a “DIFFERENCE” from competing product.

INTELLIGENT ERGONOMIC DESIGN: A Place For Everything

From the splash well to the bow, every inch of every SAILFISH model has been planned and thought through for maximum utilization of available space, functional hardware placement, and ease of use for operator and passengers. Every conceivable piece of hardware is considered, computer modeled and reviewed for correct, user-friendly placement during the design process, and a designated location provided, long before the model goes into production. Any feature that can be molded directly into the boat represents additional value to the consumer, as the only expense is the original design time. Glass, resin and gel coat are purchased by the pound, and a pound of well-designed material is the same as a pound of flat spot from a manufacturing point of view. Combine these elements with top quality hardware and components and you create value and a “DIFFERENCE” that you can see, touch and feel.

FLUSH MOUNTED HINGES AND HARDWARE.

All hinges have reversed barrels and our deck plates are recessed into the mounting surface leaving nothing protruding to stub your toes or cut your feet when boating barefoot. This detail is inconsistent at best and unavailable on most competitors' models. In addition to being a safer more comfortable design, the surfaces are easier to clean and maintain a "DIFFERENCE" the consumer will appreciate.

HIGHLY FUNCTIONAL, EASILY CLEANED NON-SKID SURFACES.

Our exclusive raised dot non skid resulted from spending years on our hands and knees cleaning dirt and fishing grime from an unforgiving surface, that held onto its contents like Fort Knox onto gold. Dot spacing on our non-skid surfaces is strategically spaced to allow the majority of all substance's to be hosed off with normal water pressure, eliminating the need for back breaking scrubbing, while providing sure footed traction in wet or dry conditions. We believe the boating public will enjoy and demand this "DIFFERENCE", that shortens their clean up time and allows for more hours on the water.

THE COMMAND CENTER AT THE HELM: Full Functionality At The Helm

More time is spent behind the helm than anywhere else in the boat. At SAILFISH we understand that this area must be highly functional, as well as offering convenient access to all controls. SAILFISH places key switches and throttles in correct relationship to each other to allow easy start up of engines during this two handed operation. The key located to the operators left and the throttle to the right, allowing the operator to start each engine while feathering the throttle at initial start up. Trim tab controls are located at your finger tips allow for operation while running the throttle and while maintaining a handhold on the wheel. Sounds simple, but a look at the competition shows many don't understand the process. A "DIFFERENCE" we understand, and find important.

100% SYSTEM MATCHED YAMAHA DIGITAL INSTRUMENTS

All SAILFISH models feature genuine Yamaha System Matched Digital Instrumentation as standard equipment, With Yamaha Command Link standard on all models from twenty-one feet and up. This feature extends all Yamaha instrumentation warranty's to the life of the engine warranty. Does it cost more to make these instruments standard? The answer is yes. Does having the finest instruments available as standard equipment for our customers, along with the best warranty in the industry make a

"DIFFERENCE"? Once again the answer is yes.

ONE SIZE MAY NOT FIT ALL

Boating is an activity enjoyed by many people of all different sizes. Our helms and helm seating accommodate those different sizes with strategic seat heights, raised footrest and functional console height's that work well for people of all heights. Instruments are angled and strategically placed to be easy to read from the driver's position, and control's located for ease of operation.

FISHING IS OUR SPECIALTY

Every SAILFISH model is loaded with more standard equipment for the fisherman than any boat on the water. Multiple rod holders are strategically located front and rear enabling the angler to secure his rods when the need arises. A toehold is provided in the built in rod lockers to allow the angler to bring big fish in over the side at the shallowest spot on the gunwale. Multiple live well options can accommodate any bait requirements, and all live wells have passive LED lighting for nighttime use. Insulated fish boxes provide storage for the catch, and built in tackle storage allows for having the right terminal tackle on board when you need it. Our low profile center console bow rails give unobstructed snag free access when fighting a fish, and make cast netting from the front deck a breeze. SAILFISH T-tops are standard with Kingfish side mounted rod holders which act as junior outriggers spreading the bait when trolling. Additional rear mounted rod holders are positioned for trolling, and allow the use of downriggers. SAILFISH helms are designed to accommodate the latest in flush mount electronics, positioned for maximum visibility for operator and passengers. Wide walkways allow for easy passage from front to rear, an important feature when fighting a fish, and recessed LED deck lighting make night fishing safe and easy. All most every advanced fishing feature has evolved from input from our loyal family of SAILFISH owners, the true experts and the crowd that demands the "DIFFERENCE".

A TIME TO FISH AND A TIME TO PLAY

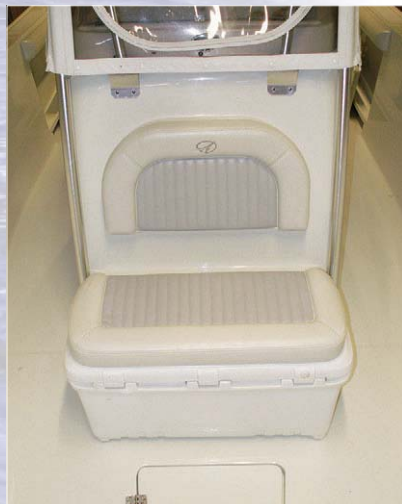

Every Sailfish model has been designed to accommodate a variety of standard and optional seating, for those times when a comfortable cruise can take the edge off of the day. Front deck design in all SAILFISH center console models allows for full cushion coverage for lounging and added comfort. We understand and encourage that the entire family enjoy our versatile products, and every effort is made to accommodate the widest variety of use.

All SAILFISH Walk around cuddy's and express models can be equipped for the serious fisherman, and function as deluxe cruiser's, minus the high maintenance normally associated with cruiser interior and exterior upholstery and finishes. A "DIFFERENCE" that offers measurable value to the boating public.

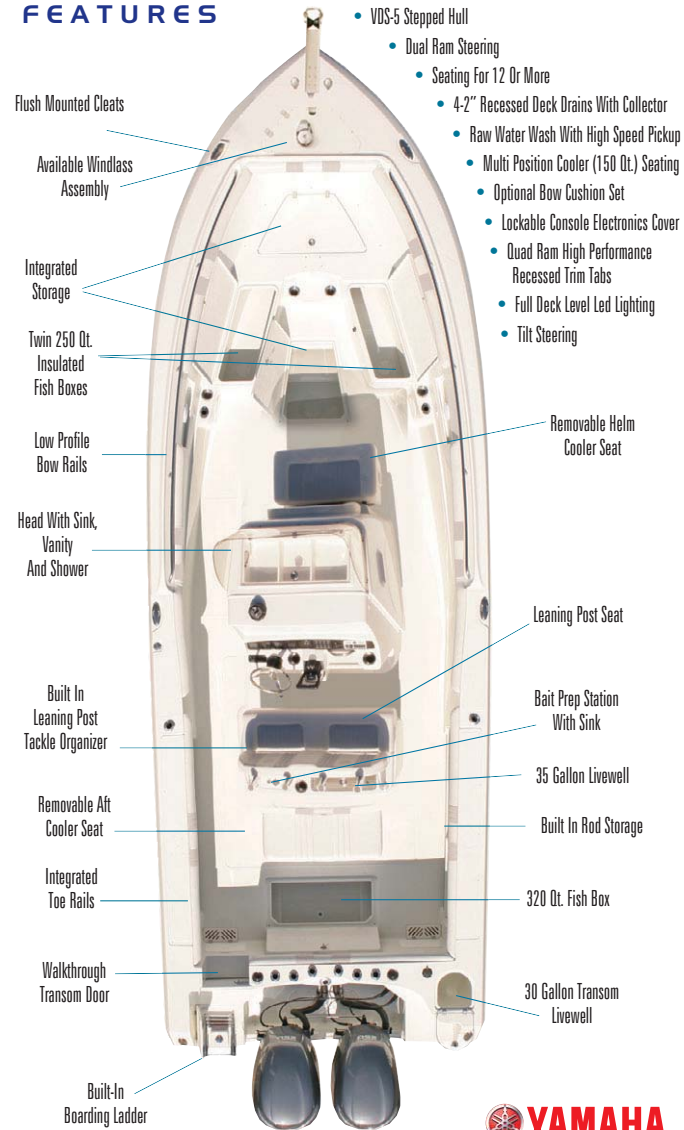

[3160CC]

FEATURES

Serious offshore capability and dazzling style make the NEW Sailfish 3160 CC the best performing big water boat we have brought to market. Our new VDS-5 hull design is the softest riding, driest hull in Sailfish history and the multiple deadrise, variable lift plane running surface, makes the 3160 CC both responsive, and extremely agile for a boat this size. But beyond the standards lies the real heart of Sailfish design, function, comfort, and practical ergonomics. Look over other brands in this size range, we think you'll agree that the Sailfish 3160 CC is the best of the best, and represents the clear choice in offshore fishing boats available at any price.
